Møder

Der er planlagt medlemsmøder på følgende datoer:

onsdag d. 17 februar Turbo PASCAL version 4
onsdag d. 16 marts Kunstig Intelligens
onsdag d. 13 april "Noget om grafik"
onsdag d. 4 maj

Møderne afholdes på adressen:

Vesterbro kulturhus, Lyrskovsgade, København V

Lokale 2-3, 2. sal. Dørene åbnes som vanligt kl. 19.
Aktiviteterne på møderne i foråret er endnu ikke helt fastlagt, men er forhåbentligt på plads når næste nummer udkommer.

INDMELDELSE OG KONTINGENT

Indmeldelse i MUG Danmark kan foretages ved indbetaling af kontingent (pt. 200 kr. årligt) på giro 5 68 65 12, MUG Danmark, ved Jørgen Petersen. Der opkræves ikke indmeldelsesgebyr.

Oplag: 300
Tryk: Dansk Tidsskrifts Tryk.
Redaktion: Leif Olsen.

Redaktionen afsluttet 1/2-87.

Næste nummer forventes udsendt i løbet af april. Indlæg eller annoncer til bladet sendes til redaktionen (Leif Olsen). Indlæg, der er på mere end 2 sider, helst på diskette eller via Bulletin-Boardet. Indlæg honoreres med et volume fra et af klubbens biblioteker.

Redaktionelt

MØDER

På mødet i februar vil Jørgen Petersen fortælle om Borlands sidste nye Turbo-PASCAL - version 4.0.

Den planlagte udflugt til Kastellet i marts er desværre blevet aflyst. Istedet har vi kastet os over et nyt og spændende emne - kunstig intelligens. Se nedenfor.

På mødet i april vil vi forsøge at finde noget om grafik - på nuværende tidspunkt kan det desværre ikke blive mere konkret.

På Bulletin-Boardet vil der, såvidt muligt, altid findes en aktuell liste over brugermøder.

BULLETIN-BOARD

Efter skift af SYSOP i november, er boardet nu oppe på fuld damp igen. Som appetitvækker bringes denne gang (ideen stjålet fra BYTE) et uddrag af to af de kørende konferencer - PASCAL og SPIL. Udover disse findes bl.a. *Hardware/software*, *Programmeringsproget C* og *Mellem himmel og jord*. Disse konferencer kører ikke kun lokalt på klubbens board - meddelelser bliver udvekslet med alle andre boards tilsluttet FIDO/OPUS echomail nettet.

MEDLEMSDISKETTE

Det lykkedes desværre ikke at samle og kopiere en medlemsdiskette inden udgangen af 87. Nu er det dog ved at være lykkedes, så sammen med dette nummer burde du finde en diskette. God fornøjelse.

Leif Olsen

MEDLEMSMØDET I MARTS

Ekspertsystemer, videnbaserede systemer og kunstig intelligens er ord man hører oftere og oftere. Nogle få danske EDB-firmaer hævder, at de producerer software efter disse nye og bedre principper. Fup eller fakta?

Hans Buchwald fra CRI vil fortælle om forskellen på Ekspertsystemer og andre EDB-systemer samt lægge op til en diskussion af tanker omkring almindelig og kunstig intelligens.

Vel mødt!

Mikkel Moulvad

Subj: Cursoroff

18 Sep 87 20:18:46

Er der nogen der ved hvordan man slukker cursoren på et EGA kort.

M.V.H. Soren Olesen

From: Nicolai Landschultz
To : Soren Olesen
Subj: Re: Cursoroff

19 Sep 87 13:02:46

Her kommer lidt cursor lal der gør at du kan sætte din cursor som du vil og derfor også slukke den:

sæt følgende registre:
Ah:=\$01;
Ch:="Toplinie"
Cl:="Bundlinie"

Derefter bruger du bare:

```
intr($10,Reg);
```

Hvor Reg er den record der indeholder alle variable.

Mvh. Nicolai L.

Subj: Selecting a programming language ..

29 Sep 87 19:09:04

With such a large selection of programming languages it can be difficult to choose one for a particular project. Reading the manuals to evaluate the languages is a time consuming proces. On the other hand, most people already have a fairly good idea of how various automobiles compare. So in order to assist those trying to choose a language, we have prepared a chart that matches programming languages with comparable automobiles.

Assembler - A Formula I race car. Very fast, but difficult to drive and expensive to maintain.

FORTRAN II - A Model T Ford. Once it was king of the road.

- FORTRAN IV - A Model A Ford.
- FORTRAN 77 - A six-cylinder Ford Fairline with standard transmission and no seat belts.
- COBOL - A delivery van. It's bulky and ugly, but does the work .
- BASIC - A second-hand rambler with a rebuilt engine and patched upholstery. Your dad bought it for you to learn you to drive. You'll ditch the car as soon as you can afford a new one.
- PL/I - A Cadillac convertible with automatic transmission, a two-tone paint job, white-wall tires, chrome exhaust pipes, and fuzzy dice hanging in the windshield.
- C - A black Firebird, the all-macho car. Comes with optional seat belts (lint) and optional fuzz buster (escape to assembler).
- ALGOL 60 - An Austin Mini. Boy that's a small car.
- Pascal - A Volks wagen Beetle. It's small but sturdy. Was once popular with intellectuals.
- Modula II - A Volkswagen Rabbit with a trailer.
- ALGOL 68 - An Aston Martin. An impressive car, but not just anyone can drive it.
- LISP - An electric car. It's simple but slow. Seat belts are not available.
- PROLOG/LUCID - Prototype concept-cars.
- Maple/MACSYMA - All-terrain vehicles.
- FORTH - A go-cart.
- LOGO - A Kiddie's replica of a Rolls Royce. Comes with a real engine and a working horn.
- APL - A double-decker bus. It takes rows and columns of passengers to the same place all at the same time. But it drives only in reverse gear and is instrumented in Greek.
- ADA - An army-green Mercedes-Benz staff car. Powersteering and automatic transmission are all standard. No other colors or options area available. If it's good enough for the generals, it's good enough for you. Manufacturing delays due to difficulties reading the design specifications are starting to clear up.

- DAIMI POSTEN 5.3-87 -

Subj: Re: Turbo Pascal ver 4

14 Dec 87 08:54:00

Jeg er næsten færdig med programmet, men jeg har et problem.
Hvordan bruger man ANSI-escape-sekvenser fra pascal. Det jeg laver
ser ikke ud til at virke.

MVH
FAR

From: Frederik Willerup
To : Frank Rasmussen
Subj: Re: Turbo Pascal ver 4

15 Dec 87 23:04:20

Hej Frank

Jeg ville umiddelbart tro, at dine ANSI-koder ikke virker, fordi
Turbo og Poly (i hvert tilfælde version 3) benytter deres egne
interne video-drivere. Når du gladeligt skriver en escape-sekvens
ud til skærmen bliver den sikkert filtreret fra af denne driver.

Du kan jo prøve at bruge bios/dos kald ved ANSI udskrivning, eller
skrive din egen lille driver.

Det var altså bare det jeg ville foreslå - hej!

Frederik

To : Frederik Willerup
Subj: Re: Turbo Pascal ver 4

17 Dec 87 06:37:32

Hej Frederik.

ANSI-escape sekvenserne virker KUN når der skrives via Dos og ikke
gennem BIOS. Jeg lavede for et stykke tid siden et program, der
kunne vise disse ANSI-billeder og så vidt jeg kan huske, loader
man characteren ind i AX og kalder interrupt 21H. Hvad DX skal
indeholde, kan jeg ikke huske, men alt det står beskrevet bl.a. i
DOS Technical reference (og sikkert en masse andre steder).

M.v.h. Lars.

Subj: Re: Turbo Pascal ver 4

17 Dec 87 23:00:36

Dit problem er at du skriver til skærmen via turbopascals egen skærmdriver, der ikke forstår ansi-koderne.

Det kan løses meget enkelt ved at angive compilerdirektivet: (*\$P1*). Tallet 1 angiver at der skal bruges en outputbuffer på en byte, hvis du hovedsageligt vil skrive til skærmen er det helt fint, men hvis du vil redirigere dit output til en fil bør du forhøje tallet til feks. 512 der er sektorstørrelsen på en diskette. Det glæder mig at du næsten er færdig med programmet, sig til når du er helt færdig, og fortæl på hvilken BBS du anbringer det. Det er jo lidt svært at gætte hvor du uploader programmet da dine meessages echoes over hele landet.

Venlig hilsen:
Jesper Wolf Jespersen

18 Dec 87 00:00:04

Hvad sker der, hvis man åbner en text-fil til con: ?
Bliver der så ikke skrevet via ANSI.SYS?

Leif Neland

SPIL

From: Ulrich Munch
To : All
Subj: Hack103

23 Sep 87 00:50:18

Hvordan kommer jeg fra level 1 til 2. Jeg kan ikke komme igennem døren.

From: Kim Lykkegaard
To : Ulrich Munch
Subj: Re: Hack103

23 Sep 87 17:08:12

Hej Ulrich,

Man enter næste level, ved at gå ud og finde den anden trappe, den kan man gå ned af, og op igen til det level man lige kommer fra. Her nede gentager samme procedure sig. Man skal ud og finde næste trappe.

Der er altid to trapper pr. level en for op og en for ned.
En gang Hack - altid Hack.

Kim

P.S. Hvis du ikke er rutineret i spillet så er en god fidus at samle så meget mad som muligt, der bliver mindre og mindre jo længere du kommer ned. Min egen record er level 8.

From: Ulrich Munch
To : Kim Lykkegaard
Subj: Re: Hack103

24 Sep 87 22:42:48

Hej Kim,

Tak for svaret. Det kunne jeg desværre bare ikke. Hvis jeg prøver at gå ned får jeg svaret: 'Mysterious force prevents you from going down', eller noget lignende. Ved du (eller andre) hvad jeg skal gøre ved det?

Mvh. Ulrich

25 Sep 87 06:09:52

Hej Ulrich,

Nej den har jeg aldrig været ude for, men har du din lille hund med ? Den skal stå på et felt der støder op til dig. Hvis du stadig ikke kan, så fortæld mig lige hvilken type du er.

KIM

P.S. er du uheldig, kan du ikke komme videre før du har fundet en spell der ophæver troldommen.

MODEM86 is a communications program for intel 8086/88 based computers. It runs under both cp/m-86 and ms(pc)-dos. It provides such features as file copying using xmodem protocol, terminal emulation, file transfer with all hosts, x-on/x-off flow control, batch mode, optional on-line help and menus, file transfer and conversion utilities, and auto-dialing.

BIN2HEX	COM	Converts a binary file to a hex file
COM2CMD	COM	Converts ms(pc)-dos programs to cp/m-86 programs
COM2CMD	CMD	Converts ms(pc)-dos programs to cp/m-86 programs
CMD2COM	COM	Converts cp/m-86 programs to ms(pc)-dos programs
DISTMDM	BAT	Copies distribution disk files - for ms(pc)-dos
DISTMDM	SUB	Copies distribution disk files - for cp/m-86
EXPAND	COM	Replaces tabs with blanks
MODEMSET	COM	Configures modem86 for running environment
MODEM86	DOC	Abbreviated user manual
MODEM86	HST	Program's revision history info
MODEM86	SET	Unconfigured modem86 program
PATCHES	DOC	Text file containing a history of programming patches
PHONES	DAT	Example phone number directory
REMOVECC	COM	Removes fortran-style carriage controls
SHRINK	COM	Replaces blanks with tabs
SIOBIOS	A86	Source for an example cp/m-86 custom serial i/o bios
SIOBIOS	MAC	Source for an example ms(pc)-dos custom serial i/o bios
UNSQZ	COM	Decodes squeezed files

IT communications program

IT is an easy to use modem communications program without a complicated setup. It has a clean uncluttered look, emulates a vt-52 terminal, supports xmodem protocol yet allows autodial with hayes compatible modems.

IT stands for intelligent terminal.

IT	DIR	Dialing directory for auto-dialing
IT	EXE	Main program
IT	DOC	Documentation (1k)

A mixture of basic and pascal programs that perform a variety of tasks.

READ	ME	Explains the file extensions of some of the basic programs On this diskette

		IRA/SPDA
IRA	BAS	Individual retirement account / single premium deferred annuity calculations for financial planners and insurance agencies. (protected)
HOLD	DAT	
IRA	DAT	data files used by IRA.BAS
PRINT	BAS	? - <have absolutely no clue as to what this program does>

		Amortization schedules
GO	BAT	Batch file to start AMRTMENU.BAS program
AMORT	BAS	Calculates loan amortization - results to the printer
AMRTMENU	BAS	Program that selects AMORT.BAS or SCRNAMRT.BAS
SCRNAMRT	BAS	Calculates loan amortization - results to the screen
AMRTMENU	ABS	Abstract of the AMRTMENU.BAS program
AMORT	ABS	Abstract of the AMORT.BAS program
SCRNAMRT	ABS	Abstract of the SCRNAMRT.BAS program

		Restaurant house-charge billing (V1.0)
GBILL	EXE	The house-charge billing program
CLEAR	EXE	Creates data files for the GBILL.EXE program
SETUP	EXE	Customizes the entire system
READ-ME		Notes for printing documentation and installing system
GBILL	DOC	Documentation (15k)

		PCBD
PCBD	BAS	A program that assists in estimating the production cost of double sided printed circuit boards.
PCBD	DOC	Documentation for PCBD.BAS (4k)
PCBD	ABS	Abstract of the PCBD.BAS program
PCBD	ASC	Ascii text file of the basic source code

		Filefix
FILEFIX	BAS	Prepares ascii text files with cr/lf delimiters for import Into the wordplus pc wordprocessing program
FILEFIX	DOC	Documentation file (2k)
FILEFIX	ABS	Abstract of the FILEFIX.BAS program
FILEFIX	ASC	Ascii text file of the basic source code
FILEFIX	PAS	Pascal source code
FILEFIX	COM	Compiled version of the FILEFIX.PAS program

		Diskfile label maker
DISK	PRG	Dbase iii source code for the disk-file system
FILELIST	TXT	List of files on this diskette
DISK	EXE	Compiled version of disk-file diskette label maker
DISKFILE	DBF	Data base for disk-file
CAPSLock	COM	Program to set caps lock to on. Place in AUTOEXEC.BAT
COMMENT	MEM	Memory file used in disk-file

TEKTRONIX 4010 EMULATOR

The program on this disk almost completely emulates a tektronix 4010 storage tube display terminal, both full text and graphics. The pc's screen may still be raster graphics (320 x 200), but all the detail is STILL THERE. Also included is a dec vt100 mode simulation.

TEKTERM2 EXE The main emulation program
TT CFG A configuration file
TT DOC A brief explanation of how to use the tekterm2 program
TT EXE A utility overlay
TTUTIL EXE A utility overlay
VDAT01 OVL An overlay to the main program
VDAT02 OVL An overlay to the main program

Volume PC-SIG 442

SPA:WN STRUCTURED PROGRAMMING/WARNIER DIAGRAM

SPA:WN is an acronym for 'structured programming automated: warnier notation'. The programs on this disk serve both as a tutorial on the concepts of structured programming, and as a working tool for helping a programmer design and document the structure of his programs.

DIR DIR Short description of the files contained on this disk
PWARN COM Executable object code for pascal warnier program
PWARN PAS Turbo pascal source for warnier program
PWARN WAR Spa:wn source for pascal warnier program
READ ME Miscellaneous matters; expl'n of files
RODGERS WAR Example spa:wn source for a fortran program
SPAWN BAT Batch file for doing spa:wn runs: 'spawn fn'
SUMMARY USE Brief, cryptic reminder of input requirements
WARNCMS LST Detailed use instructions for cms mainframe users
WARNIEEE LST Academically oriented paper about spa:wn
WARNINTR LST Introduction for structured programming beginners

----- T-scores grading system (requires an 8087 math co-processor!!)

READ ME Brief description file for t-score (4k)
TSCORE EXE Calculate t-scores, to assign equitable grades.
TSCORE S3I Sfortran source text for tscore.
TSCORE S3L Pretty 4 page listing, from sfortran processor.
TSCORE FOR Fortran source text, output from sfortran processor.
TSCORE DAT Sample data for input to tscore.
TSCORE LIS Output corresponding to TSCORE.DAT.

----- PC gradebook

GRADES BAS Ascii basica program for main routine
NOTICE BAS Ascii basica plea for money
REPORTS BAS Ascii basica routine to produce printed reports
README TXT Introductory message and notes on operation (3k)

----- Flashcards

FLASH BAS A spelling program
FLASH BAT Batch file to load FLASH.BAS in dos
FLASH DOC Documentation for FLASH.BAS (short)

----- Scr - high score organizer

SCR-MENU BAS Main program - run first from basica
SCR-EXEC BAT Batch file to start program from dos
* BAS Programs called from scr-menu (5 files)
* DOC Documentation files (12 files)

----- More education programs

MATH BAS A math program that will help you learn your math facts
MATH DOC Documentation for MATH.BAS
MENU BAS Menu for this set of programs
TYPE BAS Program to improve your typing skills
TYPE DOC Documentation for TYPE.BAS
KILL BAS Utility to save you time in basic
KILL2 BAS Updated version of KILL.BAS
KILL DOC Documentation for KILL.BAS and KILL2.BAS

The 4 separate programs on this disk are not related to each other. They have been brought together because they all help with little needs that show up with great frequency on a computer. The programs are described in the text below.

----- PC-calculator (V1.0)

CALC EXE Main program for pop-up reverse polish notation calculator
READ ME Shows how to start calc. Just "type READ.ME"
FINDKEY COM Gives 4 number code for each key on the keyboard
MANUAL Documentation (38k)
LETTER Program release letter
CALC HEO Overlay for calc
BCALC COM Allows definition of "pop-up" key

----- Hotkey (V1.01)

HOTKEY EXE Hotkey is used to redefine the function keys (f1-f10)
HOTKEY DEF Sample key definition file
HOTKEY DOC Doc for hotkey. Type "copy HOTKEY.DOC prn", hit return (5k)
CONFIG SYS Must be on boot disk. ANSI.SYS must also be present
README Starting introductory note

----- XDOS

ALARM COM An alarm clock function
CAT COM An alternative to dos's dir command
HELP COM Assistance with dos commands
LOCK COM Provides the ability to lock and hide files
NOPRINT COM Re-directs printer output to the screen
ZAP COM Two methods for securing sensitive files
XDOS DOC Reference manual for the xdos commands
PRINTMAN BAT A batch file to print this manual
README TXT A greeting file

----- EZ-menu

EZ-MENU LST A mini file that describes the 3 ez-menu files
EZ-MENU TXT Documentation for ez-menu (4k)
EZ-MENU BAS Instant, ez menu to run exe, bat, com and bas files

Willy the Worm is a high quality game that allows you to build your

DILEMMA COM The prisoner's dilemma game
DILEMMA DOC Documentation for DILEMMA.COM
RICH COM Demo for arms race model
RICH DOC Documentation for RICH.COM
BANZSHAP COM Election results comparison program
BANZSHAP DOC Documentation for BANZSHAP.COM

CHASE PAS Can you evade the robots chasing you? - in pascal
CHASE COM Can you evade the robots chasing you?
GRIME COM+ Game similar to centipede but things come at you from 4
directions (needs color graphics card)
KIRK PIC Printer art. Subject: james t. Kirk
DSK EXE Disk crash (yes, it is a game)
SHUTTLE BAS Will draw the space shuttle from any angle in 3d

Willy the Worm
WILLY COM Willy the Worm -- executable main program
WILLY SCR Data: top ten high scores and names
WILLY DAT Data: eight game screens
WILLY CHR Data: modified character set for WILLY.COM
WILLY DOC Complete documentation for WILLY.COM (5k)
EDWILLY COM Allows user to edit game screens
EDWILLY DOC Complete documentation for EDWILLY.COM (4k)
VIS COM "Hides" files on directory
INVIS COM "Un-hides" files on directory
READ ME Brief description on willy the worm

PIRATE BAS Adventure game. Find island, explore, get treasure and
return to ship.
PIRATE DOC Documentation for PIRATE.BAS.
ASTRO COM+ Asteroids game.
Q-BERT EXE+ Like arcade game. Turn squares to different colors but
watch out for balls and other obstacles.
TEMPLE BAS Temple of loth! like dungeons and dragons.
XWING BAS+ Relive star wars.
ZORK1 DOC Solution for zork i.
ZORK2 DOC Solution for zork ii.
ZORK3 DOC Solution for zork iii.
ZT16 EXE Zork tools!! great utility for any infocom game. Change a
game to a dos file, find vocab. For any game and more!!!
ZT16 DOC Documentation for ZT16.EXE. (11k)
CRISIS .EXE+ Space game (c/g required)
GODCREAT.BAS Advanced dungeons & dragons god creation program

There are two sets of files on this disk. Both deal with the sky and thus the title. The first program is an aid for pilots in plotting their flight plan data. The second program is to locate the various stars and constellations.

----- Air navigation
READ ME Text file
REVIEW BAS
AIRNAV DOC Documentation file
WESTCST DAT Data file for AIRNAV.BAS covering the west coast of usa
NORCOAST DAT Data file for AIRNAV.BAS covering the north coast of usa
CENTRAL DAT Data file for AIRNAV.BAS covering the central area of usa
EASTCST DAT Data file for AIRNAV.BAS covering the east coast of usa
USA DAT Data file for AIRNAV.BAS
AIRNAV BAS Program to prepare a flight log
----- Starfinder
RUNFIRST BAS Introduction
PRINTERS BAS
DIRECTOR BAS Prints out a directory for the program
USERMANU BAS User's manual
STARFIND BAS Star and constellation finder program (in basic)
STARFIND EXE Star and constellation finder program (executed)

A collection of games. Most are in color and require the color graphics monitor to run. Most of the games are medium to high quality, baby is a little disgusting.

KANGAROO BAS+ Donkey kong-like game
AF DOC Documentation file for AF.EXE
AF EXE+ War game based in afghanistan
BABY EXE+ Catch the falling babies as they jump from a building
PINBALL EXE+ Pinball game made using electronic arts pinball program
RIBIT EXE+ Frogger clone
MAZE1-2A EXE+ hi-res maze game (tough!)
BOOGERS! BAS Shoot your way out of a maze
ZYLGIS BAS Another pac-man clone
ZYLGIS SCR High scores for ZYLGIS.BAS

The generic adventure game system comes with it's own adventure that is both fun and challenging, our games expert was stumped for quite some time playing this one. This adventure game, different from most allows you to create you own adventure games for you own enjoyment or to pass on to your friends.

ARC51 COM Program that archives/un-archives disk information
GAGS106A ARC Entire gags program in archived format
INSTALL BAT Batch file to un-archive gags to floppy
INSTALLH BAT Batch file to un-archive gags to hard disk
READ ME Brief notes on how to un-archive and what is on this disk

another bunch of basic games for the collector or weekend game lover. All are interpreted so they can be modified to suit your own tastes.

DICE BAS A simple dice game
ELECTION BAS You get to run for president
FUN BAS A fun with numbers game
MONEYMKT BAS Can you succeed in the stock market?
PRESCH BAS A word game for pre-schoolers
RIEMAN BAS Can you survive in the intergalactic trading circle
ROBOTNKA BAS Shoot the tank before it gets to you
STAR2001 BAS Another space game
WALLST BAS Another stock market simulation

This is an user-supported adventure game, much in the vein as epyx's temple of ahsai. You start as an immortal, are allowed to chose your new mortal attributes, and are sent to earth to seek out fame and fortune.

README		Intro. File for ROGEHINT.TXT
ROGEHINT	TXT	More hints on how to get through this adventure

Volume PC-SIG 453 ADVENTUREWARE - ADVENTURE GAME

Here is a collection of 5 text adventure games, ranging from a mystery adventure to an out and out horror film adventure.

CRIME	EXE	Adventure game
HAUNT	EXE	Adventure game
ISLAND	EXE	Adventure game
SUB	EXE	Adventure game
TERROR	COM	Adventure game
TERROR	DAT	Data file for TERROR.COM

Volume PC-SIG 454 UNIFORTH

The Uniforth sampler from Unified Software Systems is a subset of the full professional Uniforth. It provides a full assembler, video editor and software floating-point arithmetic. It supports the forth-83 standard with few exceptions. You will find the sampler to be the equivalent of several commercial systems selling for \$200 or more.

UNIFORTH	COM	Uniforth main program
UNIFORTH	DOC	Documentation for uniforth (87k)
FORTH	FTH	The default file that is opened when uniforth is executed. It contains the sysgen utility, the segment utility, a game and other stuff.
VEDITOR	FTH	The configuration file for the video editor
WORDS	DOC	The vocabulary word list

Volume PC-SIG 455 PC-TYPE BY JIM BUTTON

This is mr. Button's entry into the world of wordprocessing. PC-type is a full function word processor that is ready, willing, and able to handle all your needs. This is the evaluation version. The full fledged working version is available from mr. Button for \$59.95 + \$5 for shipping charges.

TUTORIAL	<dir>	Subdirectory containing all data for TUTORIAL.EXE
PCTYPE	EXE	PC-type main program
PCTYPE	EVL	PC-type main program
INSTALL	EXE	Installation program to configure PC-type to your machine
MAKEDEMO	BAT	Batch file that makes demo of PC-type
READ	ME	Intoductory text file
BEGIN	EDT	Text file used by TUTORIAL.EXE
TEMP		Text file that shows some of the ctrl-key functions
TUTORIAL	EXE	Fully automated documentation program for PC-type

Here is another fine collection of games that will keep you busy for years to come. FIRE.EXE is a good strategy game in which you must use fire breaks and water drops to keep your section of the forest from burning away. AIRTRAX.EXE is a very good game in which you, as a air traffic controller, try to land a number of planes. PTROOPER.EXE is a good arcade shoot-em-up that will keep you guessing. And for you gamblers out there, we've got a version of the old favorite, POKER.EXE.

AIRTRAX EXE A very good air controller game
FIRE COM Can you keep a stretch of forest from going up in smoke?
HEART EXE+ Good graphic version of pac-man
HOSTAGES EXE+ Shoot your way through walls to let prisoners free
LANDMINE EXE+ Can you make it across a mine field with out going boom!
PACKGAL COM Version of ms. Pac-man, doesn't need graphics card
POKER EXE The old card game favorite
PTROOPER EXE+ Keep the invading paratroopers from landing in your country
QUBERT EXE+ Good version of q-bert

This disk contains an assortment of our finest "arcade-type" games. You can play anything from scramble to donkey kong in programs that are similar to the arcade versions. Also on this disk are games that aren't in the arcades but should be.

FLIGHTM EXE+ Protect the omegan's from the destert warriors
JUMPJOE EXE+ Donkey Kong like game using mario as a janitor
MISFAC DAT Stores an image of the missile factory in striker
SOLITARE EXE Play solitare against the computer
SPACEWAR DOC Documentation for SWH.EXE and SWC.EXE
STRIKER DOC Documentation for STRIKER.EXE
STRIKER EXE+ Public domain version of scramble
STRKHINS BAT This file will install striker on a hard disk drive.
STRKLOGO DAT Stores the image of inital helicopter logo.
STRKPARM DAT Stores screen position parameters and the key assignments.
SWC EXE+ Spacewar program for use with a color grphics card
SWH EXE Hercules graphics version of spaceware
TUNNELS DAT Stores the tunnel terrain data.

INCTAX.COM is a program which accepts data either from a file or the keyboard, or a combination of both, and calculates federal income tax for calendar 1985. After the calculation, changes in any item can be made to see how such changes affect income tax liabilities. A summary and details for form 1040 and schedules a, b, and d may be displayed or printed.

CONTENTS Text file giving a small description of the program

INCTAX CHN Inctax program that may use in conjunction with pc-money

INCTAX COM Inctax program that stands alone

INCTAX DOC Documentation file

INITINC Initialization data file for INCTAX.COM

README DOC Introductory text file

TAXES79 DTA Sample data file

This seems to be a useful collection of decision aids for farm management. Type "run" and then type the return key to start this set of tools. Basica is required.

ACRSCALC BAS Analysis of federal depreciation computations

AUTOEXEC BAT Automatic instructions to read this file

BESTCROP BAS Price & yield analysis of crop choices (equal-margin)

DATECALC BAS Computes future (gestation) dates & calendars

DRYSTORE BAS Analysis of harvest and storage cost & alternatives

FARMBID BAS Determines the maximum bid price for land or a farm.

FEEDPIGS BAS Should i feed out a batch of feeder pigs ?

FEEDSILO BAS Calculates likely dairy feed in a silo given feed rate

FEEDVALU BAS Given corn & sbm values, what's a feed worth ?

MENU BAS Menu program for basic pgms on this disk

PEARSON BAS Balances 1 ration nutrient from 2 feed sources

READ BAT Batch file to provide instructions for SCROLLCK.COM

README DOC Author supplied documentation file

RUN BAT Batch file requests date, loads basica & starts minn - aids

SCROLLCK COM Scroll lock - control with shift keys

SDIR COM 2 column directory

SOWINDEX BAS Determines a sow index, relative to the group

STEREBID BAS Calculates equivalent fob prices for fat steers at farm

TIMEC COM Some kind of time display program ???

ULOGO BAS University of minnesota logo - start here

USERDOCS BAS Explains how to make hardcopy documentation of minnaids
