14 NOV 1958

Dear Mr. Woodger,

I hope you have already received the invitation to Mainz for the meeting to be held on November 21st/22nd. Since everybody from Munich interested in formula translation will attend this meeting at Mainz, I propose to you to go to Mainz instead of Munich, but otherwise to let your time-table unchanged. Moreover I propose to fix date and title of your lecture at Zurich.

From your letter to Professor Bauer I see that you saw a copy of a description of our algorithmic language. I am very much in fear that this was only the proposal of the European group to the Americans. In the discussions with Americans the proposal was changed, so that the final version may be different from what you have read. To make sure I enclose copy of a very concentrated description of the results of these discussions. I hope this will serve you.

Looking forward to meeting you, I remain

h. Rutishauser
