
Title:

SYSTEM RELEASE FORM

TELEDATA VERSION 3 RELEASE 1

REGNECENTRALEN

RC SYSTEM LIBRARY: FALKONERALLE 1 DK-2000 COPENHAGEN F

RCSL No: 21-T010

Edition: February 1978

Author: Carl Henrik Dreyer

Keywords: Release, TELEDATA version 3, RC8000

Abstract:

Description of release 1 of the TELEDATA System version 3. Restricted distribution. Load instruction, contents of master tape and recommended user catalog. The release includes basic programs for online processing and application programs for file maintenance and invoicing.

English edition, 12 pages.

SYSTEM RELEASE FORM

Name: TELEDATA VERSION 3, RELEASE 1

Date: 1. february 1978

Date of last release: Not previously released

Table of contents:

	Page
1. General description	4
2. LOAD instruction	5
3. Description of master tape	6
4. Revisions	(none)

Appendix:

Recommended user catalog	12
--------------------------------	----

1.

General description

This first release of TELEDATA version 3 contains the basic programs for on line processing. Some of the utility programs for administration and post-processing are not included. The applications include the Skeleton Program and the model solution phase A and B (file maintenance and invoicing). The order entry part of the model is not included.

A selection of BOSS 2-jobs for creating a system from scratch is included.

The distribution of this system is restricted according to conditions laid down in the contract with the individual customer, and it may be a part of the total system.

2. LOAD instruction

For loading the system tape the following BOSS2-job will suffice. The user name and number refer to the recommandations in appendix A. Dependent on the format of the tapes delivered, the job may be changed slighlthy.

Scope

```
job project 17 size 40000 time 15 0,  
      perm disc 10000 150,  
      stat 1 mounts 10  
mode list.yes  
tape = set mto mts30101  
load tape.1  
load tape.2  
load tape.3  
load tape.4  
load tape.5  
  
finis
```

3. Description of master tape

The release is contained in one magnetic tape. It is created by the utility program SAVE.

Name of master tape: mt297041

Survey of master tape files:

File 1: CF system, BS system

File 2: Tools

File 3: TD utilities

File 4: TD applications

File 5: System creation

File 6: Empty, end save.

The following pages gives a detailed description of the content of every tape file, plus references to documentation. Every tape file includes a text file (cat1, cat2 etc.), containing the names of all the files saved.

The references mentioned can be ordered from the RCSL library.

Contents of tape file 1 (CF-BS-system)

Contents of tape file 3 (Utilities)

Entries	References
cat3	entry catalog
teletext paramtext statustext newaktt	RSCL 21-T002
changestat	Temporary version of Telestatus. No doc.
listlin writeall movetext longsum <i>claimproc</i>	Non-standard external algol-procedures required by TD.
list	Non-standard utility program. Lists text files with BOSS line numbers. Call: list <filename>
duetframe	Standard frame. English FP-keywords. Cfr. RCSL 21-T005

Contents of tape file 4. (Applications)

All entries are text files for use as source text for the compilers:

entries	References
cat4	entry catalog
dbsource	Input for SYSDOK: data base description for the model, including Skeleton RCSL 21-T006
ldssource	Input for SODALD, local data description for the model, including Skeleton. RCSL 21-T006
skpsource	Input for DUETABLER, Skeleton Program. RCSL 21-T006
modelsource	Input for DUETABLER, Model Solution (Phase A + B). No released documentation

Contents of tape file 5 (System creation)

All entries are job files used for system creation and test runs.

Entries	References
cat5	Entry catalog
initsdok	Create and initialise new sysdokfile
insertsdok	Insert dbsource i sysdokfile
transdb80	Call DATABASE80 (dbsource in sysdokfile)
transsoda	Call SODALD (ldssource)
transskp	Call DUETABLER (skpsource)
transmodel	Call DUETABLER (modelsource)
transteleop	Call ALGOL, translate TELEOP (and translate primula with SLANG)
transdcom	Call SLANG, translate DUETCOM
scopedown	First step in releasing new programs for routine use
scopeup	Release programs
scopedcom	Release DUETCOM
batchtest1	Create and initialize a new data base
batchtest2	Test run on an existing data base
onltest	FP-commands for running an online test. Includes s-commands for start of processes.

Appendix: Recommended user catalog structure
